7. New conclusions:

Firstly, the thesis presents the central concept of the topic; builds the theoretical framework of the thesis, including innovation of 4 leadership contents, 5 leadership methods of district-level Party committees towards the same-level government in Bac Ninh province.

Renewing the leadership of district-level Party Committees for same-level government in Bac Ninh province means that district-level Party Committees change part or some of the content and leadership methods of district-level Party Committees over the same-level government in a positive direction, meeting practical requirements to improve the leadership effectiveness of district-level Party Committees over the same-level government and ensure that the same-level government performs well its assigned functions, tasks and powers.

Secondly, the thesis draws 05 experiences from the practice of innovating the leadership of district-level Party Committees towards the same-level government in Bac Ninh province, in which the key experience is: District-level Party Committees correctly identify that innovating the content and methods of leadership towards the same-level government contributes to improving the effectiveness and efficiency of the same-level government's operations in the new context.

Thirdly, the thesis proposes the new breakthrough solution: To build Party committees and advisory and support agencies with sufficient qualities, capacity and prestige to match the requirements of their tasks; arrange the right leaders of Party committees and local government leaders, ensuring solidarity and unity within the Party committees.
